

Coaching Companion™

Expand the reach and the impact of your early childhood coaching efforts: Introducing the Coaching Companion - easy, flexible, proven

- ✓ Designed by teachers and coaches for teachers and coaches using the proven methodology of Practice-Based Coaching (PBC)
- ✓ Easy and powerful tool for coaches and teachers to collaborate
- ✓ Works on any connected device, minimal training required

Harnessing the Power of PBC

We built Coaching Companion because we know PBC works. You told us how frustrating it can be when coaches can't get into classrooms because of limited time and resources. So, we invested years of deep work with researchers, real coaches and teachers in early learning to design a tool to make the PBC promise a reality.

No Barriers to Enhance Impact

Built on years of experience we knew that to be effective, the coaching companion would need to be easy, flexible, scalable and affordable. So, we worked with our coaches, teachers and development team to build in these requirements.

Easy to learn and use: Shared goals, action planning and observation and feedback are at your fingertips with the Coaching Companion. Teachers can use their smart phones to video their practice and upload directly to the Coaching Companion. Quick start videos, tutorials and help desk access are available.

Built for supporting coaching: The Coaching Companion provides a systematic framework to organize coaching initiatives and ensure a focus on improvement of teaching practices and accountability.

Conversations Back and Forth

Oh you want the cow?

Name / Description

Language Modeling with Toddlers

T. Wendy is focusing on using parallel talk, repeating, and full sentences with toddlers. She will show evidence of this with a 5 minute observation of her engaged in talk with toddlers during free play.

Focused Observation

With the Coaching Companion teachers and coaches can increase the frequency of their work together, without the added cost of extra time traveling to sites, and the other resources required for in-person, or group coaching.

Coaching Companion Comparison

Use this chart to help determine which version of the Coaching Companion is the best fit for your program, state, or system to implement your coaching efforts and support the improvement of practices in your early care and education programs.
